

AGE UK HERTFORDSHIRE NARRATIVE REPORT FOR GENDER PAY GAP

The Gender Profile of our workforce at Age UK Hertfordshire

On 5th April 2021 92.64% of Age UK Hertfordshire's workforce were female, which remains similar to the previous year, of 92.14%. Whilst this is a very high proportion, this gender profile is fairly common within the voluntary sector and particularly so for a charity operating in the health and social care sector.

Upper (highest)	11.43%	88.57%

Age UK Hertfordshire is reporting a mean gender pay gap. The main reason for this is the fact that we have a predominantly female workforce and a very small total number of male staff. In addition, the largest part of our workforce is made up of casual workers in Home Helper roles, which tends to attract more female staff. Therefore, even small fluctuations in the female workforce or roles undertaken by male staff can have a significant impact on our gender pay gap.

Age UK Hertfordshire has since closed the median pay gap reported in 2020, which occurred due to the use of the government furlough scheme, of which 75% of male

staff in the lower quartile were placed on due to the covid-19 pandemic, which had forced the closure of our largest service. Because of this they were excluded from the reporting process, leading to a larger proportion of our male staff being in the upper quartiles, in comparison to females, who were spread more evenly between all four quartiles, creating the small increase in our median gender pay gap. Prior to 2020, the median pay gap had consistently been 0.00% since reporting began.

What is causing our Gender Pay Gap?

The 14.38% mean gender pay gap shows that, the average male hourly pay in the organisation is higher than the average female hourly pay rate. However, when viewed alongside the median gender pay gap of 0.00%, it is evident that the 14.38% mean gender pay gap has been affected by extremes at either end of the scale, i.e. a male with a particularly high hourly rate and a female with a particularly low hourly rate.

In the case of Age UK Hertfordshire this is due to the high proportion of female staff carrying out casual work which generally attracts a lower salary than our permanent roles. Additionally in the upper quartile there are a number of leadership roles in the organisation, some of which are occupied by male staff resulting in the increased percentage of males reported.

As a result of the small number of male staff, any changes, either in the type of posts held by male staff or the overall numbers of male staff, can have an impact on the gender pay gap figures.

The proportion of males and females in each pay quartile shows that, while the number of females employed within the organisation is much higher than males (which is consistent with the industry standard), the split across pay quartiles is still fairly even.

What we are doing about our Gender Pay Gap

Age UK Hertfordshire is committed to the principle of equal opportunities and equal treatment for all employees, regardless of sex, race, religion or belief, age, marriage or civil partnership, pregnancy/maternity, sexual orientation, gender reassignment or disability. It has a clear policy of paying employees equally for the same or equivalent work, regardless of their sex (or any other characteristic set out above). As such, it:

- has a salary structure which shows progression through pay scales alongside a robust review process
- evaluates job roles and pay grades as necessary to ensure a fair structure.

Age UK Hertfordshire is therefore confident that its gender pay gap does not stem from paying men and women differently for the same or equivalent work. Rather its gender pay gap is the result of the proportion of women to men within the organisation, the roles in which men and women work within the organisation and the salaries that these roles attract.

While Age UK Hertfordshire's gender pay gap is in line with that of other organisations within the voluntary sector, Age UK Hertfordshire is committed to doing everything it can to maintain and, if possible, reduce the gap.
