

# Top Tips for Mobile Photography

## Composition is Key:

- Explore the rule of thirds, leading lines, and symmetry to create visually appealing photos.
- Experiment with different angles, perspectives, and framing techniques for engaging compositions.
- Pay attention to the placement of your subject within the frame to draw attention and create balance.

## Learn Lighting:

- Utilize natural light and shadows to enhance your photos.
- Experiment with different lighting conditions, such as soft light or high-contrast shadows, to create mood and depth.
- Remember you mobile will produce lesser quality pictures if there is not enough light.

## Edit with Care

- Use popular mobile photo editing apps to enhance your photos. (SnapSeed, VSCO).
- Adjust skin and color tones, exposure, saturation, highlights and shadows, and apply creative filters.
