

Age UK Cornwall & Isles of Scilly
Thank you to South West Water

South West Water continues to offer support for our Information & Advice service...

Age UK Cornwall & the Isles of Scilly are happy to announce that South West Water have kindly offered to support us again this year, as one of their adopted charities in the South West. South West Water have donated a further £5,625.00 to support the ongoing work of our information and advice service.

Lee Davies, Marketing & Communications Advisor of **Age UK Cornwall & The Isles of Scilly**, “This is the 5th year that South West Water has given us this wonderful donation. We want to offer our thanks to South West Water and their staff, who continue to support our charity year on year.

“This fantastic donation will go directly towards supporting our **Information & Advice Service** and our amazing network of volunteers. This amount is invaluable as we continue to help individuals throughout Cornwall. Last year this vital service supported people to claim benefits totalling an incredible **£1,695,158**. With help from partners, such as South West Water, we hope to better this total again this year!”

Our **Information & Advice Service** can often mean the difference between heating or no heating and eating or not eating. This gateway service can also reduce social isolation and the escalating dependency on statutory services. To continue offering this **free service**, which is mostly supported by volunteers giving their time, skills and experience, we need support from donors throughout Cornwall.

‘Just £20 will help an individual gain, on average, over £2,000 in benefits. What’s stopping you from donating!’
