

Volunteer role

Social Prescribing admin support

We are looking for someone with good IT and communication skills to support our team of social prescribers. Social prescribers support people by connecting them with services and organisations to support them to achieve identified goals. Client's are referred by their GP practice.

We are seeking support from a volunteer to enable the social prescribing coordinators to spend more time with clients. The volunteer role will include inputting client information on to our data base, sending information out to clients and arranging appointments for the coordinators. The volunteer will receive training and ongoing support. Ideally the volunteer will be based in our Bognor Regis centre but could potentially be based in our Littlehampton office.
