Talking about it and doing something to avoid it happening can make a difference.

## Keeping Safe and Active

Are we staying active? Are we doing something simple every day, like walking or exercising, to keep up our strength?

## Keeping Your Home Safe

Are we keeping our home safe from things that trip us up? Does the house feel safe to get around?

## Looking After Your Health

Are we eating properly and drinking enough water? Are we taking our time and checking for trip hazards?

## Checking Your Eyesight

Are we making sure our spectacles have been checked out every two years, and do they help us see clearly?

## Taking Care of Your Feet

Are we looking after our feet? Do our shoes and slippers have good solid support and soles that stop us slipping?

Keeping us Active, Healthy and Safe is surely worth a chat.

Have you fallen or nearly in the last 12 months?

Do you know why you fell, and do you remember where?

Do you want help to try and stop falling again?

I fear falling or have fallen more than once.	The risks have made me stop and think.	All this makes sense.
It's time to do something or get help	It's time to get some advice	Let's have this chat again.

We can help. Get help if you need it
