

# Guess how many sweets are in the jar!

Here's how it works:

- Start off by printing out this sweepstake pack and host your sweepstake in person.
- Ask each participant to guess a number of sweets for a suggested price of £3 per name to create a prize fund.
- Write down the participants name and their guess.
- When all of the guesses have been made, announce who guessed closest and present a share of total prize money to them and donate the rest to Age UK.

# The jar had **55 sweets** inside!

Did you guess correctly?
