Interval training	Consists of a series of repeated rounds of exercise, lasting varied amounts of time.
Fartlek training	Involves varying the intensity or speed of your run to improve your fitness and endurance.
Hill training	Improves leg-muscle strength, quickens your stride and can even protect your leg muscles against soreness.

Any training regime carries with it potential risks as well as the many health benefits and we would like to make sure you are as safe as possible.

If you do have any injuries or illnesses, or if you are pregnant, we would always recommend speaking with your GP before increasing your training load.

Hi, we are Sam and Ash from SMASH Mind and Body and we are delighted to be working with Age UK to support you through your training for the London Marathon 2026. We want your training to be as efficient as possible but we also want you to enjoy the journey! We will be regularly updating your running support webpage and will be hosting Zoom running workshops (with Q&A at the end of each one) as you follow our plan. We want you to feel your best and we know that our motivation and support, alongside your own strength and determination, will ensure that race day is enjoyable and a big success!
